

## SPACE AGE TECHNOLOGY

The same type of minds that doubted whether a pistol made partially of plastic could work would at one time probably thought the earth was flat.

Fortunately, for demanding sport shooters the world over, Gaston Glock thought differently. And his Glock Pistol—the first safe action semi-automatic 9mm pistol made primarily from the toughest steel and space age polymers—has set a trend for a whole new generation of durable sidearms.

Ingeniously engineered with fewest parts, no screws and lowest weight, Glock pistols have set new standards of safety, performance, simplicity and cost effectiveness. Yet, it is reliably capable of using the most advanced ammunition that have made it the choice of U.S. allies and law enforcement agencies in the free world.

### ATTENTION:

All responsible firearms owners practice basic firearms safety.

Thoroughly read and understand the users manual that is supplied with your firearm. Never use any firearm unless you can completely understand its operation and safety features.

**THE COVER:** Just the thing for a little summer picnic clay-bird breaking. Winchester's Model 42 .410 shotgun has long delighted wingshooters and collectors alike. This month beginning on p. 24 we offer a brief history of the little shotgun by Ned Schwing, the author of a recently published book devoted to the gun, which was manufactured from 1933 through 1963. Design by Doug Barnes; photo by John R. Lamson.

**CAUTION:** All technical data in this publication, especially for handloading, reflects limited experience of individuals using specific tools, products, equipment and components under specific conditions and circumstances not necessarily reported in the article, and over which the National Rifle Association (NRA) has no control. The data has not otherwise been tested or verified by the NRA. The NRA, its agents, officers, and employees accept no responsibility for the results obtained by persons using such data. We disclaim all liability for any consequential injuries or damages. See asterisked "section" in staff column, page 4.
