

# THE AMERICAN RIFLEMAN

OFFICIAL JOURNAL OF THE NATIONAL RIFLE ASSOCIATION OF AMERICA

**DECEMBER 1973**  
 This issue 1,070,000  
 89th Year of Publication

## THE COVER

This somewhat enlarged view of a Forsyth patent "scent bottle" percussion rifle lock depicts the first step away from flintlocks toward modern firearms ignition. The bottle contained a chemical set off by percussion to ignite the rifle charge. This principle later gave rise to the metallic centerfire primer. (Photograph from the Smithsonian Institution.) For more on the subject, see p. 20-24.
