CAR=DRIVER

**The
Blue
Maxi**

THIS MONTH'S COVER: Design Consultant Gene Butera and Art Director Noel Werrett were presented with a unique problem when we told them what this month's feature story would be—how does a magazine test its competitors? Their solution shows why they're considered among the best designers in publishing.

NEXT MONTH'S COVER: We aren't about to scoop ourselves by showing a picture of the C/D Blue Maxi. It's a car that was built especially for Car and Driver, and it's the most exciting dual purpose car any enthusiast could have. Agree with us or not, but don't miss the July issue. On sale June 19.
