SPIRATONE *does it again!*

All Spiratone Lenses carry ten-day money back and lifetime guarantee. A topgrain leather case is supplied with every lens.

Each lens individually numbered

Spiratone Telephoto lenses for 35mm and reflex cameras focus with the standard rangefinder or reflex finder. Just use your regular settings for distance, lens opening and exposure — the telephoto doubles the size of your subject matter on the negative. Magnification is about two times and a subject taken at 50 feet will appear as large as though it had been only 25 feet from the camera. With your effective focus length doubled, you crop out unnecessary background from the beginning. No need to mask enlargement later and worry about grain and fuzziness!

All Spiratone lenses are fully achromatic, color corrected and coated, $\frac{1}{4}$ wave length. Every lens covers the full negative area sharply to the extreme corners.

Spiratone Wide Angle lenses are the first offered at this unusually low price for almost all 35mm cameras. The wide angle doubles the picture area, a must for interior and architectural photographs. Picture-taking in narrow spaces is now possible: a wideangle increases the versatility of your camera tenfold. No changes in exposure or lens opening are necessary, but the depth of field of your present lens is vastly increased.
