

X-ray tubes that prove inner soundness of castings, giant transmitter tubes, television picture tubes, giant transmitter tubes, television picture tubes, electronic tubes for scores of purposes—all last electronic tubes for scores of better evacuation of longer, work better because of better evacuation of atmosphere with DPi-engineered equipment.

High vacuum dehydration has greatly extended

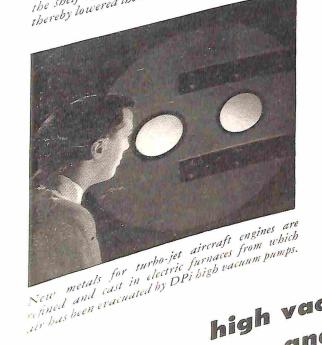

High vacuum dehydration has greatly extended

the shelf-life of vaccines and serums . . and has

the shelf-life of vaccines and serums .

the shelf-life of vaccines pharmaceuticals.

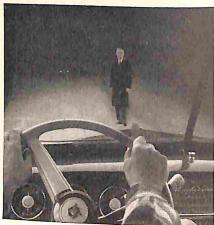

thereby lowered the cost of precious pharmaceuticals.

high vacuum research and engineering Also... witamins A and E... distilled monoglycerides... more than 3300 Eastman Organic Chemicals for science and industry.

Toys, metallized wrapping materials, jewelry, sequins emerge from DPi vacuum-coating chambers—beautiful, durable, and so inexpensive that much of it can be sold over dime-store

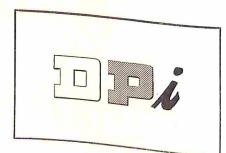

Automobile headlights containing reflectors coated under high vacuum make night driving safer. Your new car also is beautified by plastic name plates, born button, and other interior ornamentation metallized under high vacuum.

## these products

TOTHING means—getting rid of air and gas, creating the highest vacuum for the job.

In the absence of interfering molecules of air, many prod-can be processed faster and cheaper, new products ducts can be processed faster and cheaper, new created, old ones improved. Gift Quality Vintage Magazines

Perhaps high vacuum can serve you. DPi builds equipment which makes high vacuum a practical, inexpensive production tool, applicable in many surprising ways. If you would like to learn how high vacuum can work for you, or if you wish to improve your present high vacuum operations, write to: Vacuum Equipment Department, Distillation Products Industries, 751 Ridge Road West, Rochester 3, N. Y., (Division of Eastman Kodak Company).

SOIL by Charles E. Kellogg The loose material of the land is in dynamic evolutionary flux. Presenting

a brief summary of the nature of soil and the variegated factors that influence it, with a field trip over some of the world's principal soil types. 30

COUNTERS by Serge A. Korff

The devices which detect ionizing waves and particles from the atom have become fundamental tools of science and technology. Their diversity has increased with man's increasing interest in atomic radiations. 40

GENETICS AND CANCER by Leonell C. Strong The investigation of malignant growth has profited greatly by the breeding of biologically identical mice. The genetic approach to cancer has

also produced some basic facts concerning the nature of the disease. 44 THE LIMITS OF MEASUREMENT The refinement of measuring devices has revealed a basic uncertainty

of observation. An account of the physical basis of this limitation in the statistical nature of events at the molecular and atomic level. 48

ANIMAL COURTSHIP by Lorus J. and Margery J. Milne The behavior of many species of birds, insects and spiders before mating is strange and wonderful. All these curious preliminaries, however, have a rational basis in the sensory equipment of each species, notably vision. **52**
