## The toughest little kid on the dock: the 1964 Merc 39

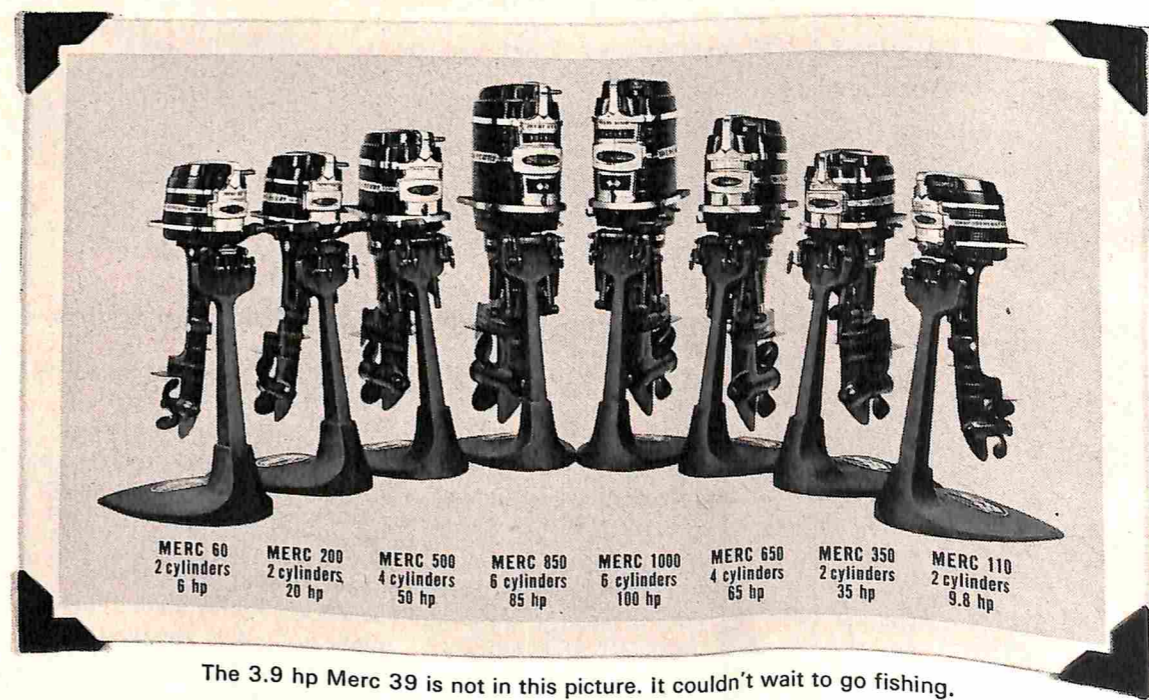

This little fellow is the newest arrival in the Mercury family. It's a chip off the old block and the resemblance is obvious. It's pint-sized but a real roughneck... and you won't find a better fisherman anywhere. Merc 39 packs 3.9 horsepower... performs like a five hp... and it's a miser on fuel. Merc 39 is a single-cylinder water-cooled outboard and has all the quality features of Merc's more powerful twins... things like Glide-Angle styling and Jet-Prop exhaust.

AND THAT'S THE SMALLEST NEWS FOR 1964. Here's Mercury's Silver Anniversary Fleet... the result of 25 years of engineering leadership in outboards. It's the most complete selection of outboard power ever offered.

SEE YOUR MERCURY DEALER SOON!  
HE'S LISTED IN THE YELLOW PAGES.

Subsidiary of Brunswick Corporation

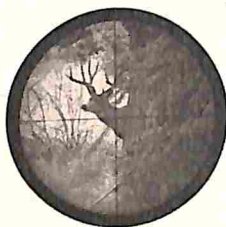

The 3.9 hp Merc 39 is not in this picture. it couldn't wait to go fishing.

10/63

# Where **A ZERO** Counts

ZERO-IN this combination of Browning Rifle and Scope and you'll score better, consistently.

*Two precision elements that make point-of-impact and point-of-aim so closely coincident with a Browning Rifle.*

There's a lot of know-how in making a Browning Rifle shoot so well; the individual bedding of barreled action to thoroughly seasoned walnut . . . the hand adjusting of the trigger mechanism so it is crisp, smooth, and just the right weight . . . and above all, the patient care with which the barrel is fabricated — perfect concentricity, mirror smooth and meticulously balanced to the caliber for which designed.

Then as final confirmation that the finished rifle delivers the exacting type of precision that went into its making, it must pass a complete targeting series before qualifying for personal ownership.

The Browning Scope complements this kind of precision. Its every component, from a strong, rigid mount to an always centered reticle, is designed to hold perfect zero through the roughest treatment, and its brilliant clarity adds confidence on the most difficult shot.
