

SPACE AGE TECHNOLOGY

The same type of minds that doubted whether a pistol made partially of plastic could work would at one time probably thought the earth was flat.

Fortunately, for demanding sport shooters the world over, Gaston Glock thought differently. And his Glock Pistol—the first safe action semi-automatic 9mm pistol made primarily from the toughest steel and space age polymers—has set a trend for a whole new generation of durable sidearms.

Ingeniously engineered with fewest parts, no screws and lowest weight, Glock pistols have set new standards of safety, performance, simplicity and cost effectiveness. Yet, it is reliably capable of using the most advanced ammunitions that have made it the choice of U.S. allies and law enforcement agencies in the free world.

ATTENTION:

All responsible firearms owners practice basic firearms safety.

RULE #1—*Always* keep the firearm pointed in a safe direction.
