# The NEW RUGER® BLACKHAWKS®

## .30 Carbine Caliber

## 9mm and .357 Magnum Cal. Convertible

**T**HE RUGER Blackhawk is recognized as the most versatile center-fire single-action revolver ever produced. Specifically designed and engineered to handle the big handgun cartridges, Blackhawk and Super Blackhawk revolvers provide great strength for the popular .38 Special, .357 Magnum, .41 Magnum, .44 Special, and .44 Magnum calibers. Now, with two new developments, the Blackhawk revolver is more versatile than ever.

## the .30 Carbine Caliber BLACKHAWK®

This new Ruger Blackhawk provides the many owners of M-1 carbines with a companion handgun. In its own right, the .30 Carbine Blackhawk is a superbly accurate, flat-shooting field gun, ideal for varmints, small-to-medium game, or just plinking. In addition, it fills the "Magnum gap" between the .22 Magnum and .357 Magnum cartridges. With the Blackhawk's 7½-inch barrel, the .30 Carbine cartridge develops an energy of over 600 foot-pounds, with a muzzle velocity approaching 1600 fps. Incorporating all the mechanical refinements and advantages for which Blackhawk Single-Action Revolvers have become famous, this new model is the ultimate in handgun strength, reliability, and smoothness. Details: Cylinder frame same as the .44 Magnum caliber Super Blackhawk, barrel length 7½" only, overall length 13½", weight 44 ounces, price \$87.50.

## the .357 Convertible BLACKHAWK®

Our wonderfully versatile new Blackhawk Convertible handles the powerful and popular 9mm Parabellum cartridge by means of an extra cylinder, easily interchangeable without tools. It also handles all .38 Special and .357 Magnum caliber cartridges, like our regular .357 Magnum caliber Blackhawk. Rugged, totally reliable, and superbly accurate, this is the ideal answer for the shooter in remote areas, because there's virtually no place in the world where ammo for this handgun cannot be readily obtained. Specifications are the same as for the standard .357 Magnum caliber Blackhawk except that the Convertible is supplied with 2 interchangeable cylinders. Your choice of 4½" or 6½" barrels. Price \$97.50. (An extra 9mm cylinder can be factory-fitted to existing .357 Magnum caliber Blackhawk Revolvers. Cost of cylinder and fitting is \$16, plus shipping charges to and from our factory.)
