AMERICAN RIFLEMAN

SEPTEMBER 1987 103rd Year of Publication Volume 135, No. 9

A PUBLICATION OF THE NATIONAL RIFLE ASSOCIATION

J. Warren Cassidy, Executive Vice President

The NRA, the foremost guardian of the traditional American right to "keep and bear arms," believes every law-abiding citizen is entitled to the ownership and legal use of firearms, and that every reputable gun owner should be an NRA Member.

FEATURES

11-87: Remington's Lucky Number?	Robert W. Hunnicutt	34
A Reloading Regeneration	Finn Aagaard	38
The Facts About "Plastic" Guns	James Jay Baker	42
Coping With Steel Shot	Edward A. Matunas	44
Holland & Holland's Quail Gun	Tony Jackson	50
Hercules Reloder 12	William C. Davis, Jr.	52
The Double Rifle	Alex Brant	56
Exploded Views: S&W Model 29	James S. McLellan	58

Dope Bag	Technical Staff	64
NRA Shooting Events	J. Scott Rupp	80
U.S. International Championships	Col. M. S. Gilchrist	82
DCM Notes	Jim Rikhooff	96
Mixed Bag		

THE COVER: Remington's new 11-87 autoloading shotgun offers the basic design of the multimillion-selling 1100 with a new feature. It will fire 2 3/4" 3" Mag. ammunition interchangeably without adjustment. Offered with screw-home in the upland fields or the waterfowl marshes. For a report, see p. 14. Design by John Reid, photo by John R. Lamson.

CAUTION: All technical data in this publication, especially for handloading, reflect the limited experience of individuals using specific tools, products, equipment and components under specific conditions and circumstances not necessarily reported in the article, and over which the National Rifle Association of America (NRA) has no control. The data have not otherwise been tested or verified by the NRA. The NRA, its agents, officers, and employees accept no responsibility for the results obtained by persons using such data and disclaim all liability for any consequential injuries or damages. See asterisked section in staff column, page 4.

"Out performs the expensive at a fraction of the cost"

...Ross Seyfried, shooting editor; *Guns and Ammo*

Until PACT introduced the PC last year, shooters for a chronograph were torn between two choices. To go with a full feature skyscreen based machine at a premium price, or purchase a low end "break screen" or "down range box" at a more reasonable price, but lacking the ease of use and superior performance of a microprocessor based skyscreen machine.

Each time you fire

Your shot number, velocity and current average velocity are displayed simultaneously on our state of the art, easy to read, 32 character display. Because this information is displayed and stored automatically, no button pushing required, you are free to concentrate on your shooting instead of having to fiddle with your chronograph every time you want to know what shot you are on or what your current average velocity is.

After you have completed your string, simply press the review button to display a complete statistical summary of your string. This summary consists of your highest and lowest shot velocities and their corresponding shot numbers, the extreme spread and Mean Absolute Deviation (MAD) of your shot string. MAD is, in our opinion, the best indication of ammunition consistency yet developed.

In addition, all shots (up to 200) can be individually reviewed after you have finished your string. Why is this important? When using other chronographs, with no or limited review capability, you must shoot, stop, put down your gun, pick up your pencil, write down your velocity, put down your pencil, pick up your gun and repeat. That stinks! With your PACT PC you get your shooting out of the way first, then make a permanent record of your string either by hand or with our optional printer.

- uses standard 9 volt alkaline battery (included, of course)
- Edit button allows you to remove any unwanted shot from a string, either after the shot is fired or during review.
- adjustable screen separation
- 4 mhz counter for better digital accuracy
- retractable tilt stand for easy viewing

PACT Skyscreens

The PACT PC uses inexpensive optical skyscreens to detect the bullet. Why didn't we set it up so that you can shoot over the box or use expensive skyscreens containing elaborate lenses to "enhance" performance? Because we think it's stupid to launch bullets over things that cost lots of money. Now we realize that **you never miss**, but rarely a day goes by that we don't get an order for a replacement skyscreen housing (\$2.50).

Glint Guard™ pat. pend.

Over the years chronographs have earned a well deserved reputation for **flaky performance** when operated on sunny days. Some
