COMPARE RMA'S TAN DURASOFT® FABRIC TO OTHER CAR COVER MATERIALS
ALL CAR COVERS ARE NOT THE SAME... DURASOFT® CAR COVERS

- Tan DuraSoft® is a full 8 oz. cotton blend... lasts 3 to 5 times longer than 100% cotton or other 5-6 oz. fabrics. Resists ripping or tearing.
- Machine washable without shrinking.
- Light tan color keeps car 10% cooler.
- Machine treated with 3M Scotchguard™ for water repellancy. It is highly breathable.
- Theftguard™ option stops theft of cover. Also aids in installation in windy conditions. Patent #4355839.
- This option not available on any other car cover.

OTHER CAR COVERS
• 100% cotton fabric will rip or tear easily while other fabrics don't have the durability of Tan DuraSoft®.
• Other car covers are designed to "universally fit" many cars.
• 100% cotton fabrics will shrink.
• Darker covers absorb heat.
• Many other fabrics are coarse or flannel lined... which causes abrasion and scratch fine paint finishes.

Features

1912 STEARNS-KNIGHT: The majestic, luxurious Stearns-Knight with its unorthodox sleeve valve engine was one of the most magnificent and fastest cars of its day 10

THOMAS FLYER: The Thomas Flyer that won the 1908 New York-to-Paris race recently returned to New York for the first time since winning that historic event more than 75 years ago 14

'55 T-BIRD: The first Thunderbird brought Ford into a whole new market and its sporty little two seater was greeted with enthusiasm. Although the original Thunderbird concept would survive only three seasons, it left a lasting impression 18

MORGAN: With styling that remained "vintage" over the years, the Morgan sports car was periodically upgraded with contemporary mechanics. This 1961 Plus 4 two-place roadster exemplifies the Morgan's timeless styling 26

NASH: Good times for the man, the car and the company 36

MERCEDES-BENZ: Capturing that special "aura" of a king 46

CONTINENTAL: The engine specialist becomes a motor car maker... 54
