JUNE 1999 • VOLUME 63, NO. 6

FEATURES

32 X-ray update New airport luggage scanners are even more damaging to your film! *Herbert Keppler*

★ 66 How pros use color now Eye-popping, supersaturated color is now the norm. *Dan Richards*

★ 72 Should you use enhanced-color films? What are they, when are they the right choice, and when do they bomb? *Michael J. McNamara*

78 WOW! While on a whale watch, Flip Nicklin takes the kind of picture you dream about. *Herbert Keppler*

★ 80 99 color films compared! A guide to films for every occasion. *Harold Martin & Michael J. McNamara*

★ 84 Camera test: Nikon F100 Is this Son of F5 even better than its illustrious sire?

92 Lens tests Two zooms: Nikon's 80–200mm f/2.8D IF-ED and Tamron's 28–300mm f/3.5–6.3 LD IF.

DEPARTMENTS

8 Letters Our readers retort.

12 Snapshots Photographic glasnost; psst...wanna try a camera?; ultimate archival storage; surf & turf; Carleton Watkins.

16 Your best shot Try a different angle.

18 SLR For sharpest images, do you really need a mirror lock-up? If so, why don't all top cameras have it? *Herbert Keppler*

26 Point & shoot OK, what's so bad about a 38mm lens? (Nothing!); Pentax's new WR can still take a bath. *Dan Richards*

34 Hands on So why do you need the Quantum Turbo Z flash battery pack? *Peter Kolonia*

36 Travel From colorful honky-tonks to secluded beaches, the Jersey Shore is a lensful. *Bob Krist*

42 Digital Focus Can a software program boost your photo creativity? Probably, but it'll cost you 50 bucks! *Jon Pepper*

48 Digital just out A printer, scanner, software, and more.

50 Phototronics Some nifty flash units and plenty of nickel-metal hydride batteries seen at the big show. *James Bailey*

52 Color How you can use inexpensive sheets of tinted acetate to solve complicated lighting problems. *Peter Kolonia*

58 Too hot to handle Crystal crash, bear truth, zoom scam.

60 Just out A selection of new photo products.

62 Time exposure From beach beauties to Uri Geller.

236 Final frame Sharon Borel nails her subject.

★ COVER STORIES

COVER

The cover shot of our Nikon F100 test camera provocatively perched atop a mountain of assorted color films was taken by New York pro Tony Cordoza in his studio. His camera was an 8x10 Deardorff view camera fitted with a 4x5 back and a 240mm f/9 Schneider G-Claron lens. He lit the colorful subject with 3 Speedotron electronic flash heads plus one spotlight aimed at the top of the camera, another pointed at the film boxes, and a third to illuminate the blue paper background. Exposure on unfiltered, normally developed Fujichrome Provia: 1/60 sec at f/45.
