

|   |     |   |
|---|-----|---|
| Kenneth Goodall   | 16  | <b>Tie Line</b> Some mass-media advertising that portrays blacks perpetuates black stereotypes; veterans with spinal-cord damage develop meaningful sex lives; near-death and death and the mystical experience; and other items.                   |
| Alan C. Elms  | 36  | <b>Stimulus/Response: Horoscopes &amp; Ardrey</b> Robert Ardrey's writings abound in simplistic explanations and melodramatic arguments, a social psychologist asserts.   |
| T George Harris and Carol Tavris  | 47  | <b>No Turn Unstoned</b> , An Introduction to physician-researcher Andrew Weil's work.   |
| Andrew Weil   | 51  | <b>The Natural Mind—A New Way of Looking at the Higher Consciousness</b> The major portion of this new book, soon to be published by Houghton Mifflin.  |
|   | 52  | <b>Part I. Through the Looking Glass</b> Most drug research produces useless information; there are no facts free of value judgment; the ideas in this work are revolutionary.  |
|   | 53  | <b>Part II. Straight Thinking</b> is ordinary thinking. It relies on the intellect and on the ordinary waking state, lapses into materialism and pessimism. It imprisons.   |
|   | 60  | <b>Part III. Stoned Thinking</b> relies on intuition, accepts ambivalence and experiences infinity. It can help us to heal our bodies. It liberates.  |
|   | 65  | <b>Part IV. Why People Take Drugs</b> The drive to alter consciousness is basic but our society suppresses the urge and sanctions only alcohol-induced stoned states.   |
|   | 84  | <b>Part V. Is Anything Wrong With It?</b> The real objection to drugs is that they prevent people from reaching the highest stages of consciousness.  |
|   | 90  | <b>Part VI. What No One Wants to Know About Marijuana</b> It has virtually no effect on the body; it is an active placebo in the drive to alter consciousness.  |
|   | 94  | <b>Part VII. The Amazon Way</b> Amazon societies regularly use drugs to alter consciousness. Drugs used in their natural forms in ritualized ways appear to be safe.  |
|   | 95  | <b>Part VIII. Where to Go from Here</b> We should move beyond drugs and learn to alter consciousness by natural means.  |
| Arnold J. Mandell, David S. Segal, Ronald T. Kuczenski, and Suzanne Knapp | 68  | <b>Brain Chemistry: The Search for the Schizococcus</b> We are not likely to find a single chemical cause for schizophrenia, but research indicates that adaptive mechanisms within the brain play a major role in the onset of the disease.        |
| Edgar Morin   | 77  | <b>Rumor in a City in Central France</b> A sociologist investigates a rumor of white slavers and describes it as a manifestation of a modern middle age, a society out of balance.  |
| Edgar Morin   | 80  | <b>The Sociology of Crisis, A Definition</b>  |
| Jerry Higgins   | 103 | <b>Schizophrenia: It Comes in Two Kinds</b> The process schizophrenic, good-boy son of a dominant mother and weak father, is in real trouble. The reactive schizophrenic, son of a weak mother and a demanding father, can hope for rapid recovery. |
| Jerald G. Bachman and Jerome Johnston                                     | 113 | <b>The All-Volunteer Armed Force, Not Whether But What Kind</b> The promise of four years of college in return for military service would attract better-qualified recruits and reduce the threat of a straight, for-pay professional army.         |
