ARTICLES

THE FOOD PROBLEM

by Lord John Boyd-Orr

The chronic hunger of two thirds of the world's people is a constant economic and political threat to the other third. A distinguished student summarizes the problem and an approach that would help solve it. 11

POWER FROM THE SUN

by Eugene Ayres

While man steadily consumes his large but limited store of fossil fuels, a bounteous supply of energy is showered upon him by the sun. What are the basic difficulties that stand in the way of tapping this energy? 16

THE PARALYTIC PLAGUE

by David Bodian

The virus that causes the symptoms of poliomyelitis has a subtle relationship with man. Many people harbor the virus without showing the symptoms, a fact which has an important bearing on its epidemiology. 22

EYE AND CAMERA

by George Wald

The classical comparison of the two devices has sometimes seemed superficial. Today, however, it is more pointed and fruitful than ever. The analogy has proceeded beyond the optics into physics and chemistry. 32

EXPLORING THE OCEAN FLOOR

by Hans Pettersson

Swedish oceanographers have recently developed some remarkable new instruments for probing to great depths. Their use on the long voyage of the *Albatross* has opened up a new frontier of the earth's solid surface. 42

THE AGORA

by Homer A. Thompson

It was the public square and the center of the good life of the ancient Greek city-states. The Agora of Athens, which in civic architecture would compare favorably with modern cities, is now extensively excavated. 46

THE NAVIGATION OF BATS

by Donald R. Griffin

It has long been known that bats can dodge obstacles in the dark. In recent years the statement "bats have radar" has almost attained the status of a folk legend. Experiments have shown that it is almost true. 52
