## VINCENT MARINARO— IN THE RING OF THE RISE

How wild trout really react—page 41

Expert trout fisherman Vince Marinaro, by means of words and pictures, delves into the mysterious and fascinating world of the trout. With graphic photographs Mr. Marinaro shows us the basic rise forms—the simple, compound and the complex—and then goes on to tell how and why trout react the way they do. Answered are such questions as how a trout really takes a fly, why all rises look alike to the angler, the effect of drag on a fly and how to eliminate it, new casting techniques—and much, much more. In 13 colorful and informative pages the world of the trout is opened to anglers who want to know more about their sport—and about trout. 41
