

SCREENS you put up from inside in seconds

Columbia-matic TENSION SCREENS

Columbia-matics fit outside the window, just like ordinary screens, yet they go up from inside. They are the revolutionary new screening idea that saves you time and money and lets you say good-bye to old-fashioned screen troubles.

Columbia-matics are flexible, full length. Extra heavy selvage and spring-loaded bottom rail hold screen tightly to window, eliminating need for side frames and assuring complete insect protection at all times.

Easily installed the first time—anyone can do it. They come in exact sizes, no fitting. All you need is a screwdriver. Rustproof aluminum* needs no painting, ever. Available with regular or Kaiser Aluminum Shade Screening.

Two patented tension locks anchor bottom rail securely to sill. Press down, they're locked. Flip up, screen swings free. No hardware on sill to snag clothing.

Columbia-matics cost no more than ordinary screens. Millions now in use. Get the facts at your screen dealer's. Or mail coupon.

*Available with galvanized screening in certain western states.

The new "room" everyone wants—the garden room that's more than a terrace and more private than the sun parlor on the street. The Raymond Armstrongs, of Haddonfield, N. J., planned one for a "someday" farm, but added it, instead, to their present home, to enjoy here and now. Photograph by F. M. Demarest.
