

**new Safe way
to store guns**

**PREVENTS RUST
OR CORROSION**

**READ WHAT THE
N.R.A. STAFF SAYS**

Al Barr (N.R.A. Tech. Div.) **says:**

"There is no doubt that when a gun is cleaned as it should be and then placed in one of the Rust-Pruf Gun Pouches it will stay in good condition indefinitely."

Gen. Hatcher (Director, N.R.A. Tech. Div.) **says:**

"I've made some comparative tests on pieces of metal, polished bright and placed in these pouches with the chemical element as against others placed in pouches without the chemical element. The ones that did not have the chemical element have rusted; those that had the chemical element have not rusted to date, even though one of these was left outside in the weather and water managed to seep into the pouch. In spite of the fact that water has been in the pouch, the piece with your chemical element has not yet rusted."

Rust-Pruf Gun Pouches

are transparent plastic pouches containing a "chemical element," a war-time discovery which *positively* prevents rust or corrosion on all metals.

Pouch is tough, oil . . . grease . . . water . . . flame . . . dust proof. Weather changes do not affect it; special plastic won't crack or become brittle in desert heat or deep-freeze cold. Lasts for years with reasonable care. Size 10" wide, 53" long—large enough for any shotgun or rifle, even with scope and sling. "Chemical element" lasts a full year. Replacements only 25¢. Written guarantee and complete directions.

Use Rust-Pruf Gun Pouches for storing guns or tools safe from rust, etc. The chemical element in the pouch prevents rust by slowly vaporizing. This neutralizes moisture or corrosive gases. The pouch prevents oil or grease on guns from staining walls or clothing in closets. It also keeps out dust, moisture, fingerprints, etc.
