

THE AMERICAN RIFLEMAN

OFFICIAL JOURNAL OF THE NATIONAL RIFLE ASSOCIATION OF AMERICA

AUGUST 1976

This issue 1,158,000
92nd Year of Publication

THE COVER

This remarkable shotgun was made by FAMARS of Brescia, Italy. It's a 28-bore four-barrel gun with both hammer locks and interior box-locks. For more on this and other four-barrel guns, past and present, see articles beginning on page 21. FAMARS photo.

The enduring qualities
of the **10/22**® result from
uniquely innovative improvements
in the design of rimfire rifles.

Shooters who choose semi-automatic 22's are people who shoot a great deal and demand endurance from their firearms. For this group, the Ruger 10/22 is the logical choice. Built to high power rifle quality, the 10/22 mechanism is exceptionally smooth and reliable.

Additionally, the Ruger 10/22 provides such innovative features as a rotary, 10 shot magazine, a special dovetail barrel attachment and a unique receiver design that gives a light, well balanced solid-feeling rifle of great durability.

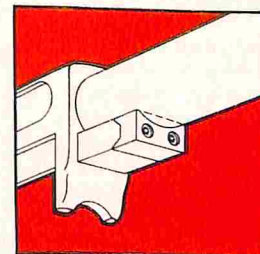

The machined, American walnut stock with its traditional barrel band and metal butt plate, perfectly complement the engineering excellence of the 10/22.

The Ruger 10/22 is the result of attention to the details that make a rifle perform properly and look and feel right while doing so.

SPECIFICATIONS:

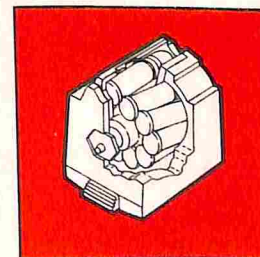

- American walnut stock
- Receiver drilled and tapped for scope blocks or tip-off adapter
- Folding rear sight adjusts for elevation and windage
- Cross-button safety works only when rifle is cocked and locks sear and hammer
- Caliber 22 long rifle high velocity or standard velocity
- Weight 5 pounds, length 37" (18½" barrel)
- Available in two styles:

- Standard Carbine \$77.50
- Deluxe Sporter with hand-checked pistol grip and forearm \$89.50

Exclusive dual-screw barrel attachment

Two longitudinal screws, working through the heavy V-Block barrel retainer, pull the barrel tightly into the receiver, rigidly locking these two parts together. This strength contributes to the excellent accuracy of the 10/22 and is another example of how Ruger applies innovative improvements to conventional problems.

Unique 10-shot rotary magazine

Easy to load, the simple, rugged magazine fits smoothly into the contour of the stock, leaving no unsightly bulge. The retaining lips and cartridge-guiding ramp are of solid alloy steel that won't bend or deform, thus eliminating feeding malfunction. Extra magazines can be easily carried in a pocket or coat.
