### LIFE'S PICTURES

The sequence of pictures showing a rocket-assisted take-off (p. 80-81) were taken by former LIFE Photographer Horace Bristol, now a lieutenant in the U. S. Navy. The camera which recorded the pictures is a new Navy device developed by Bristol and Lieut. Duncan MacPherson. It makes fifty 4x5-in. pictures in 22 seconds at regulated speed. Known as the K-22½, the camera is being used by the Navy to get picture series of new inventions in action.

The following list, page by page, shows the source from which each picture in this issue was gathered. Where a single page is indebted to several sources, credit is recorded picture by picture (left to right, top to bottom) and line by line (lines separated by dashes) unless otherwise specified.
