# This Accurate Watch Keeps America's Crack Trains on Schedule

Why the fastest trains in the world  
are timed with this watch.

"WHAT TIME HAVE YOU?" Ask this question of a group of business men. Out come their watches. One watch is three minutes slow, another five minutes fast, and so on. But ask this question of a group of railroad men. If there is any variation it is usually only a matter of seconds.

Yet it is so very easy for every business and professional man to have a watch as unfailingly accurate as the railroad man's. When you buy a watch get the make he uses. For thirty years there has been one watch that has been generally favored on America's railroads, a watch that has earned the unique distinction of being called "The Railroad Timekeeper of America."

This watch of accuracy fame is the Hamilton. It rides in cab and coach of such famous liners as the Twentieth Century, the California Limited, the Broadway Limited and the Champion. When you buy a Hamilton, accuracy is assured. The secret of Hamilton's accuracy is its capacity to take in pains. With us every watch is an individual piece of mechanism, tested and re-tested until final accuracy is
