

SL 95 handles  
them better.  
Prove it to  
yourself...

Here's how an umbrella spindle handles a stack of records. One area support—three retractable metal "fingers" at the center of the record. It's good... but now try this. Here's how the Garrard SL 95 handles a stack of records. Two point support—at center and edge. Recognized as the gentlest, surest and safest mechanism on the market. It's an exclusive Garrard feature.
