including postal zone numbers.

Type "98" oil ring—U. S. patent numbers 2,635,022 and 2,695,825

Engineering triumphs that again raise the standard of engine performance... add thousands of extra miles with sustained power and greater oil economy

In Perfect Circle's 2-in-1 Chrome piston ring set, the top compression ring was specially designed to perform where pressures are greatest, heat is highest, and lubrication poorest. The new Type "98" oil ring with self-expanding spacer assures a uniform seal against the cylinder wall plus a side sealing action on the ring groove. Both the top compression rings

and the oil rings are plated with thick, solid chrome that resists wear, more than doubles the life of cylinders, pistons and rings. For thousands of extra miles of sustained power with positive oil control, ask your Doctor of Motors to install Perfect Circles in your car. Perfect Circle Corporation, Hagerstown, Indiana; The Perfect Circle Co., Ltd., Toronto, Can.
