- SALT WATER 90
- SPORTING DOGS 108
- LETTERS 6
- SPORTSMAN'S QUIZ 30
- SPORTSMAN'S INFORMATION PAGE 78
- SPORTS AFIELD WHERE-TO-GO GUIDE 112
- TAILFEATHERS 128

Page 50

You need Jeep guts
to pick up and go—anywhere.

The Jeep Gladiator— the only pick-up built from the ground up with 4-wheel drive.

This pick-up goes places that others can't.

The reason is simple. Only the Gladiator is 4-wheel drive from scratch. That's why it has a higher ground clearance and a lower center of gravity than any other 4-wheel drive pick-up. And it's

the only one with rugged multi-leaf springs on all four wheels. That gives you stability to spare.

Other pick-ups aren't built the

same way. They start as 2-wheel drive and are jacked-up to add 4-wheel drive. They look it and they feel it. And they ride that way. High. They're priced high, too. Ford, Chevrolet, and all the rest have upped their list prices \$200 or more.

Not the Gladiator. This year it's from \$100 to \$110 less than last year.

This 8000 GVW Gladiator still rides mighty. With the guts to handle the largest payload in its class—more than two tons. You can

put on just about any kind of camper.

Comes with all those options you want or need. Even air-conditioning.

When you want to get away from it all, you need the Jeep Gladiator.

The toughest
4-letter word on wheels.
