

Your stomach knows  
the difference between  
these pain relievers...

And this one.

The pain relievers doctors call NSAIDs — aspirin, the latest drug with naproxen sodium, and even ibuprofen — have a number of similarities.

An important one has to do with your stomach. To varying degrees, every NSAID brand can sometimes irritate your stomach. That's because NSAIDs may reduce your stomach's natural ability to protect itself.

But **TYLENOL**® is different. It won't irritate your stomach. You know how well **TYLENOL** works. And now you know it's definitely gentler to your stomach. The choice is clear. The choice is yours.

**Tylenol. The pain reliever  
hospitals use most.**
