

With the Valmet
Combination Shotgun/Rifle

There are no surprises.

There is one gun that lets you take advantage of the full range of hunting available to you.

It's the Valmet Model 412 Shotgun/Rifle Combination, which teams the hitting power and pattern of a 12-gauge with the range of your choice of .222, .223, .243, 30.06 or .308 caliber.

As a turkey gun, the Valmet 412 Combination will greatly enhance your capability for dealing with that most intelligent and craftiest of game birds.

No matter what target of opportunity may appear, you are ready.

It's Part of the Valmet Shooting System

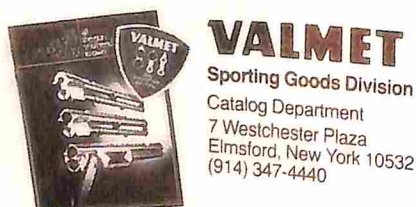

Because it is part of the Valmet Shooting System, you can convert your Valmet Combination Shotgun/Rifle into an over-and-under shotgun or into a double rifle in a matter of seconds. Your dealer offers a choice of more than 20 interchangeable barrels and 4 interchangeable stocks.

Valmet's basic guns are highly affordable. Buying additional barrels without paying for a whole new gun makes the Valmet Shooting System a real value!

Besides unique component interchangeability, Valmet offers features usually associated with guns costing far more — sure and easy zeroing of both barrels to one impact point, automatic safety, trigger-mounted barrel selector, fired-barrel indicator, monobloc locking, two-piece firing pin and more.

Before you buy any gun, you owe it to yourself to see Valmet.

WEIGH THE ADVANTAGES, AND YOU'LL WEAR BROWNING.

ADVANTAGE Weight.

You can take about a pound off your feet by lacing on a pair of Browning Waterproofs instead of the competitors' waterproof boots. Multiply the steps you take in a hard day's hunting by a pound and the answer will be, ouch! You don't need an extra pound to carry around all day. But at the same time Browning gives you more weight, Browning gives you more quality.

ADVANTAGE Open Cell Foam Insulation Versus Closed Cell.

Browning Waterproofs are fully insulated from top to toe with 3/8 inch open cell foam that breathes to wick perspiration away from your foot. Most of our competitors use only 1/8 inch closed cell foam, which is like putting your feet in a plastic sock. Browning knows a dry foot is a warmer foot.

ADVANTAGE

Comfort Right Out of the Box.

Notice how soft and supple Browning's leather is, while other boots are stiff and bulky. That's one reason they break in easier and are more comfortable to wear. Another is the cushion your foot gets from the generous foam insulation and the smooth nylon tricot lining. Nylon tricot is lighter, as durable and more comfortable than leather lining. Moisture won't crack, rot or harden tricot. Browning does not use a weighty, poured midsole. Browning's trim midsole allows your foot to flex comfortably.

ADVANTAGE

Browning's Extra Durability.

Browning Waterproofs give you Vibram's best sole for firm support,

bonded to the best top grain, silicone impregnated leather uppers. All seams and stitching are generously sealed with liquid latex and will not dry out or become brittle. Spring steel shanks and top quality insoles give you solid, yet comfortable arch support.

Quality is assured if your footwear bears the Browning name, and you pay no more for Browning's better boot. Weigh all the advantages. You'll pick a pair of Browning boots.

FREE CATALOG

Showing Browning's entire line of outdoor gear including 16 different hunting, chukka, western and pack boots for hunting, fishing, around camp use or casual wear. Send a postcard to Browning, Dept. B8, Morgan, Utah 84050. Distributed in Canada by Browning Canada Sports Ltd/Ltée.
