

There's a GREAT DAY COMING!

ELECTRONIC COOKING
will do in minutes what now takes hours

Imagine putting your roast in the oven as you sit down to dinner... and finding it ready to serve by the time you've finished your soup! Yet scientists predict such speed, economy and convenience are only a few of the many benefits *electronic cooking* can bring to post-war homes.

Because this method generates heat from the *inside* at the same rate as from the *outside*, food can be cooked through with no danger of burning, no wasteful shrinkage, no loss of valuable juices. Weight and thickness make no difference, either... 100 lbs. can be cooked as fast as 1 lb. And since the heat is concentrated in the food, utensils stay comparatively cool—hands are not burned.

Delco Appliance salutes the scientists whose electronic applications promise so much for future home life. Our own use of electronics is now confined to war production, because "Victory Is Our Business"... but with peace, it will help us build new and finer Delco Appliances for your home.

Delco Appliances include Automatic Delco-Heat (oil-coal-gas), Delco Water Systems, Delco-Light Power Plants and Delco-Light Batteries.
