

Your good results with KIMSUL* sold me on it!

It's the many-layer construction that makes KIMSUL a better insulation

Why KIMSUL is scientifically superior —easier to install

44† Layers in One Blanket—With 44 separate layers of insulation backed with heavy water-proof paper and stitched together, KIMSUL is scientifically superior to loose, bulk insulation in these ways: (1) Provides uniform protection over every inch of insulated area. (2) Retains original thickness—no sagging, sifting, settling.

Installing is Easy as ABC—Anyone who can use a hammer can install KIMSUL. Put it between joists of the unfloored attic... or between rafters of the sloping roof, if your attic is floored. Extremely light, compressed into a convenient, compact roll, KIMSUL is easy to carry. Pleasant to handle, contains no irritating, sharp, metal-like ingredients.

Enjoy New Comfort—With KIMSUL installed in your attic, your home will be far more comfortable all year 'round. In winter you'll have warmth aplenty with as much as 30% less fuel, and in summer a cooler, more livable home. Order KIMSUL today from your lumber or building supply dealer, hardware or department store.

Fire-Resistant—There is no insulation known that will make your home fireproof. But the insulation must not add to the fire hazard of a wood frame structure. KIMSUL meets this requirement because it is chemically treated to resist fire.
