Car Craft December 1981 Volume 29 Number 12

18. Beauty is in the eye of the beholder, right? We really hope that no one's offended by our choices for this story because it's all meant in jest anyway. And besides, even if you like *some* of these machines, we defy anyone to like *all* of them! Of course the editor's personal favorite was the Tempest wagon. "Damn fine car," he called it.

50. Now that we have your attention (and this lovely person obviously has Jon Lundberg's), let's talk about the AHRA World Finals. Oh, you'd rather talk about the girl? Just another stunning entrant in the English Leather Calendar Girl Contest. You should have been there. We were, and here's a complete report on the "other" sanctioning body.

57. Jeff Smith came into the office and said, "Well, I've got a picture of the cat that built the big-block Mopar to go with the story." Well, we can't find Jeff right now, and this is the only photo we found in his office. Somehow we have the feeling that he didn't exactly mean *this* cat.
