### 20 OLD SCHOOL MEETS NEW

Whether you prefer the traditional Mouse or want to get into an LS-series powerplant, we compare them, show how they fared on the engine dyno, and break down the cost.

### 22 LATE-MODEL 402CI LS2 30 406CI TRADITIONAL MOUSE

### 40 IN THE REAR WITH THE GEARS

We show you how to make your 8.2-inch 10-bolt handle serious abuse.

### 46 SUBFRAME TO SURFACE MISSILE

Update your first-gen Camaro with the latest suspension goodies.

### 52 RUST-B-GONE

Getting rid of cancer in your old iron is easier than you think.

## ON THE COVER

We have to thank Michael Kelcy from teamcamaro.com and Eric Winston from ls1tech.com, both of whom made this 11th-hour cover shoot possible. Not only were they willing to meet us in a remote area miles from home, but they dealt with the blazing 110-degree temperature like a pair of seasoned veterans while Wes Allison captured them in motion.
