TECH!

- 22 HOLLEY HAPPENINGS**
We swap four Holley carburetors onto a 415ci small-block and flog each one through the quarter-mile!
- 36 HIGH-VOLTAGE POWER**
From top to bottom, we explain how a Performance Distributor HEI really works.
- 40 JUST THE RIGHT SIZE**
We pick, tune, and dyno three Demon carburetors on a hungry 468ci fat-block.
- 46 A NEW AGE OF PRO TURNING**
We get the skinny on Schwartz Extreme Performance's trick Chevelle and Camaro frame.
- 52 PAC IT IN**
Want more power for your Gen III 5.3L powerplant? Look no further.

ON THE COVER

This month, shutterbug Wes Allison caught two bullies side by side at California Speedway's newest quarter-mile facility. Up front is Bobby Mahoney's normally aspirated Marina Blue '67 Chevelle that throws down 510hp to the rear wheels. Rolling next to him, in the Hugger Orange '71 Nova, is Matt Sendejas' 10-second thrill ride that gets the job done on nuts alone. Up in the corner, associate editor John Nelson snapped the eye-catching '69 Camaro, veiled in PPG Viper Red.
