JOURNAL OF THE AMERICAN MUSEUM OF NATURAL HISTORY

- 8 **A MAN APART** *Paul Bohannon*
An anthropologist relates the madness, death, and funeral of Dago'om, an "expendable" member of the Tiv tribe in Central Nigeria.
- 26 **THE BIOLOGICAL MUSE** *Philip C. Ritterbush*
For centuries the imaginations of poets, artists, writers, and philosophers have been intrigued by the essential beauty of biological organisms.
- 32 **RISE AND FALL OF THE INDIAN OF THE WILD WEST** *Peter Farb*
The picturesque culture of the Plains Indian was artificial, not aboriginal; it developed in response to alien influences about mid-eighteenth century.
- 44 **A DAY IN THE LIFE OF A POLAR BEAR** *Fred Bruemmer*
Much is known of the daily habits of the largest carnivore in the world, but his seasonal movements or possible annual migrations remain a mystery.
- 52 **LIGNUMVITAE—RELICT ISLAND** *Edward O. Wilson and Thomas Eisner*
"To enter the forest on Lignumvitae Key is to step far into the past, and to come as close as we ever will to witnessing the Keys as they were before the coming of man."
- 58 **THE DOLPHIN OBSERVED** *David K. and Melba C. Caldwell*
The authors consider dolphins fascinating and valuable subjects for communication studies, but find no evidence of a "human type" language.

COVER *Ripe fruit of lignum vitae on forest floor*

- 6 **THE AUTHORS**
- 20 **A NATURALIST AT LARGE** *Marston Bates*
- 42 **SKY REPORTER** *John P. Wiley, Jr.*
- 43 **CELESTIAL EVENTS** *Thomas D. Nicholson*
- 70 **BOOKS IN REVIEW** *Durward L. Allen*
- 84 **SUGGESTED ADDITIONAL READING**

Alexander M. White, President *James A. Oliver, Director*
Walter F. Meister, Thomas D. Nicholson, Charles A. Weaver, Jr., Assistant Directors
James K. Page, Jr., Publisher, Natural History Press

Robert E. Williamson, Managing Editor *Alfred Meyer, Executive Editor*
William Gilman, Jack Hope, Senior Editors *Thomas Page, Art Editor*
Avis Kniffin, Associate Editor *Florence Klodin, Copy Editor*
Anne Chamberlin, Asst. Copy Editor *Carol Breslin, Reviews Editor*
Sharon L. Osborne, Information Services *Emily Guth, Production*
Ernestine Weindorf, Nancy Larson, Pamela Goode, Staff Assistants

Gerard Piel, Thomas D. Nicholson, Stanley A. Freed, Vincent Manson,
Gordon Reekie, Donn E. Rosen, Evelyn Shaw, Editorial Advisers

Harvey Oshinsky, Advertising Director
Dinah Lowell, Traffic *Gail Butterfield, Asst.*
Anne Keating, Promotion Director *Maureen Fitzgerald, Asst.*
Joseph Saulina, Circulation Manager

Publication Office: The American Museum of Natural History, Central Park West at 79th Street, New York, N.Y. 10024. Published monthly, October through May; bimonthly June to September. Subscription: \$7.00 a year. In Canada and all other countries: \$7.50 a year. Single copies \$1.00. Second-class postage paid at New York, N.Y., and at additional offices. If your record player today still has a heavy turntable, it must have yesterday's motor

Why did Garrard switch from heavy turntables (which Garrard pioneered on automatics) to the scientifically correct low mass turntable on the SL 95? Simply because the synchronous Synchro-Lab™ Motor has eliminated the need for heavy turntables, developed to compensate (by imparting flywheel action) for the speed fluctuations inherent in induction motors. The light, full 11½" aluminum turntable on the SL 95 relieves weight on the center bearing, reduces wear and rumble and gives records proper edge support.

The Synchro-Lab Motor has also made variable speed controls as obsolete as they are burdensome to use. The synchronous section of the motor locks into the rigidly controlled 60 cycle current (rather than voltage) to guarantee constant speed regardless of voltage, warm up, record load and other variables. This means unwavering musical pitch. And the induction section provides instant starting, high driving torque and freedom from rumble.

At \$129.50, the SL 95 is the most advanced record playing unit available today. For Comparator Guide describing all Garrard models, write Garrard, Westbury, N.Y. 11590.
