# What makes a child seat safe is how an adult uses it.

Make sure the harness  
isn't fastened too loosely.

Make sure the harness  
is fastened over  
the child's shoulders.

Make sure you have a  
seat appropriate to the  
weight of the child.

Make sure the car's  
safety belt is routed  
through the seat correctly.  
In this case, it goes through  
the back of the seat.

Make sure the seat faces  
in the proper direction.

Make sure your seat has  
labels certifying that it  
meets federal safety standards.

One-third of all child seats aren't used correctly. It's one reason traffic accidents are the leading cause of death in children. To change that, double check your child's seat. Read all instructions and follow them carefully. Allstate championed child seats long before they became law in all fifty states. Through our "Buckle Up Baby" program, we offer infant seats to employees when their children are born. That's because a child seat improves a kid's chance of surviving an accident by 70% if used correctly.

For a free booklet by the American Academy of Pediatrics and a discount coupon from Sears on child seats, write to: Allstate, Dept. 500, P.O. Box 7600, Mt. Prospect, IL 60056-9961. As adults, it's our job to make sure child seats are used right all the time.
