DISSTON ANNOUNCES THE NEW DISSCHROME CIRCULAR SAW BLADES

...chrome plated for longer service...faster, easier sawing

Here's the brightest new look in circular saw blades for portable and bench saws. The finest Disston craftsmanship combines with gleaming, durable chrome to make these circular blades the best at any price.

Chrome plating does this for you:

- Increases edge-holding qualities of saw teeth ...a quality for which Disston saws are already famous.
- Reduces friction and heat, thus prolonging saw life.
- Resists rust.

- Resists accumulation of gum and pitch on side of blade.
- Saves you money and effort.

LONG-SERVICE DISSCHROME Circular Saw Blades are individually hardened and tempered to hold their edge. Each tooth is carefully sharpened for fast, clean, power-saving cutting.

HANDY DISSCHROME Circular Saw Blades fit all popular makes of portable and bench saws. Blade sizes up to 12". A full selection of tooth types.

**SAFETY-AIM
HEADLAMPS**

*Buy in pairs
where you see*

Give your family, and yourself, the extra protection afforded by new Guide T-3 Headlamps—aimed right, as they can be day or night! It is only a matter of minutes to have them aimed. Then you're sure of all the latest scientific light-beam direction approved by lighting and safety authorities.

Get Guides—ask for them by name and have them aimed. You'll then have stepped-up light power and the pattern of light on "full" or "dim" that is safest for you and for other drivers. For added safety make a habit of dimming your headlamps whenever you approach another vehicle. Take this precaution, and "AIM TO LIVE."
