Why Do Planes Collide?

Fifty-seven passengers in this airliner (left) and the one that hit it were lucky: all got out alive. But 175 other people have been killed in 34 of 86 other mid-air collisions in the last five years. For a report on possible causes and cures, see "Scientists Tackle Pilots' Deadly Blind Spots"—page 114.

Four weeks' notice is needed to change a subscriber's address. Please give both old and new addresses, including postal zone numbers.

Chrome

is where the heart is!

Yes, the heart of any engine is the piston and rod assembly... and Perfect Circle's 2-in-1 chrome piston ring set gives complete protection against wear where the power is produced!

No chrome piston ring set can really give complete wear protection in the "heart of the engine" unless it provides a chrome-plated TOP ring, as well as a chrome-plated oil ring. For the top ring operates where heat is highest, pressure is greatest, and lubrication is poorest!

That's why Perfect Circle's 2-in-1 chrome piston ring set has established new standards of ring performance... why it seals compression and controls oil for over twice as long as old style sets! And only 2-in-1 furnishes an alternate HiPressure spring with each oil ring, for positive control even in badly worn engines!

Perfect Circle Corporation, Hagerstown, Indiana;
The Perfect Circle Co., Ltd., Toronto, Ontario.

Perfect Circle

PISTON RINGS • The Standard of Comparison

In the 2-in-1 set, solid chrome plating on these ring surfaces resists wear over entire area of ring travel. Cylinders, pistons, and rings are assured double life.
