They Like Ike's Atomic Ideas

When President Eisenhower dramatically proposed (right) to the United Nations that an international bank of fissionable materials be created for peaceful uses, POPULAR SCIENCE MONTHLY promptly rounded up some nuclear scientists and asked them what they thought of the idea. Their inspiring reactions, transcribed from magnetic tape, are reported in the article, "If Atomic Fuel Were Shared," beginning on page 101.

Four weeks' notice is needed to change a subscriber's address. Please give both old and new addresses, including postal zone numbers.

A syllogism*.. for all car owners

- 1 Cylinders wear most at the TOP
- 2 Chrome plated rings retard wear
- 3 Therefore TOP rings must be chrome plated to retard cylinder wear

Solid chrome plating on top and bottom rings gives wear protection throughout entire area of ring travel. Only 2-in-1 furnishes alternate HiPressure spring with every oil ring, for badly worn engines.

No so-called "chrome" piston ring set is complete unless it offers the protection of chrome on the TOP ring as well as on the oil ring! For the top ring operates where most wear occurs... where heat is highest, pressure is greatest, and lubrication is poorest!

Because it provides double wear protection... with chrome on both the top ring and oil ring... Perfect Circle's 2-in-1 chrome set seals compression and controls oil for over twice as long as old style ring sets! No tedious break-in period, either! So, for thousands of extra miles of top engine performance insist upon 2-in-1! Perfect Circle Corporation, Hagerstown, Indiana; The Perfect Circle Co., Ltd., Toronto, Ontario.

Perfect Circle

2 in 1 chrome piston rings

The standard of comparison

*Deductive reasoning
