OCTOBER, 1953

## A Geologist Reviews Facts About Dowsing

Howard A. Meyerhoff—who wrote this month's lead article, "Can a Water Witch Really Find Water?"—is a distinguished geologist who has spent much of his career looking for oil and water. Formerly secretary of the American Association for the Advancement of Science, he is now president of the Scientific Manpower Commission. His scientific view of dowsing begins on page 99.

# Imagine fun like this —with 60 second snapshots!

SNAP IT!  
A MINUTE LATER...  
THE FUN BEGINS!

That's the joy of a Polaroid Land Camera. You admire the finished picture right on the spot. And it's yours for sure! If the subject moves, or the pose isn't right, you can shoot again before your chance is gone forever.

- HAVE YOU SEEN TODAY'S POLAROID PICTURES?
- ✓ They're big, sparkling black and white prints like this.
  - ✓ A new plastic finish gives them lasting beauty.
  - ✓ Every roll of film is guaranteed.\*

YOU SHARE THE FUN with your family—with the little girl in the picture. That very day, you'll show the picture—or mail it right off—to friends!

A CINCH TO USE! To load, simply drop in the film. No tanks, liquids, or fuss. Want just one picture? Take just one! No need to use up a whole roll.

YOU'LL HAVE ENLARGEMENTS AND COPIES MADE directly from your prints by Polaroid's special process. They'll come back to you so quickly and cost so little, you'll wonder why you kept dusty files of negatives.

HAVE YOU SEEN A POLAROID CAMERA IN ACTION LATELY? Let your photo dealer take your picture. You'll be amazed at the high quality of today's 60-second pictures. It takes only a minute.

**PATHFINDER**—f/4.5 lens... shutter speeds 1 to 1/400 second... coupled range-finder... the aristocrat of 60-second cameras.

**MODEL 95**—The thrifty family camera anyone can use indoors or out, rain or shine.

\*If you're ever dissatisfied with the results from any roll, send the pictures to Polaroid and you'll get a new roll free.
