# Why you should buy a chain saw from a company that cuts it with lumberjacks.

Homelite is the largest maker of professional chain saws in America.

Which is a great reason to buy their new homeowner's saw.

Because it just makes sense that the company that can satisfy the demands of the professional logger can make a saw to meet the needs of the average homeowner.

And a perfect example of that is the new Homelite XL which sells for under \$100.

The XL has a tough, lightweight engine which allows you to feel like a lumberjack without requiring that you be built like one. It also features an all-weather ignition system which

makes for fast starts. And automatic chain oiling. For \$99.95, the new XL is really a great chain saw.

But then again, so is the Homelite XL 2, which sells for \$119.95. The big thing about the XL 2 is that it has two triggers.

A trigger up front which lets you get right up on top of your work, where you need control.

And a second trigger in the rear to give you leverage for the big jobs.

The XL 2 also tips the scales at a light 7½ pounds.\* It comes with a 12" guide bar. And the same Power Tip® sprocket nose that professional loggers use to boost their cutting power.

And right now, to really make a case for buying the XL 2, we throw in a case, free. This carrycase regularly sells for \$10.95 and can accommodate the chain saw plus all its accessories.

Of course, another benefit in buying a Homelite chain saw is that we have more dealers to serve you if something should go wrong. More than 7,500 of them in the U.S.

Homelite's XL and XL 2. Considering everything they come with, it's hard to believe what they go for.

## HOMELITE®

For the Homelite dealer nearest you, check the Yellow Pages under Saws. Homelite, a **textron** Division, Port Chester, N.Y. 10573.

\*Less bar and chain. Free carrycase offer good at participating dealers only while supply lasts. Expires December 31, 1974. Suggested Retail Prices: XL, \$99.95; XL 2, \$119.95.
