IN THIS ISSUE

For detailed table of contents, see page 4.

Survival Begins at Home

Preparing for emergencies includes knowing how to prevent the spread of disease. These simple rules for keeping clean can save lives. Page 10.

Viruses: Molecules That Cause Disease

Working in a borderland between living matter and dead, these parasites bring disease to creatures millions of times their size. Page 23.

Doctor Beaumont's Strange Partner

Dr. William Beaumont, a surgeon in the War of 1812, participated in one of the most astounding case studies in medicine's history. Page 26.

Disaster Street

Most public employees in Pasadena, California, use this street as a unique training facility in public health and safety work. Page 28.

One for a Man, Two for a Horse

This amusing look at the patent medicine industry recalls the fads, follies, and foibles of self-doctoring in the good old days. Page 32.

What Is the True Cost of Medical Care?

Recklessly used statistics and irresponsible charges have obscured the truth about physicians' share of the medical care dollar. Page 42.

Primitive Medicine: Magic, Miracle, and Myth

Medicine men used statues, necklaces, and masks made of clay, wood, and animal bones to bring good health and ward off evil spirits. Page 44.

When Your Baby Has Colic

What is colic? Is it dangerous? What can I do about it? Here are pediatricians' answers to these questions from new mothers. Page 54.

How to Build the Right Wardrobe for You

Teen-age girls: Don't miss these tips on how to save money and still be a candidate for the yearbook citation of "best dressed." Page 55.

COMING NEXT MONTH—

How Science Is Saving Stroke Victims

This year, approximately 4000 Americans will die each week from stroke. Thousands of others will be disabled during their working years by this ailment, sometimes known as apoplexy. But many victims of stroke can be restored to normal or near-normal life today because of recent advances in x-ray and surgical techniques, plus the development of anti-coagulant drugs and plastic blood vessels.
